

ICT audits in charities

Key challenges, emerging risks, and a framework for success

Paul Sypko, Keith Collins and David Membrey

17 October 2017

About Adapta...

- A specialist information systems consultancy
- We only work with membership organisations, charities, associations, trusts and others in the NfP sector
- We are completely supplier-independent
- Our consultants have held senior positions in a broad range of different organisations
- Our advice and guidance is based on practical experience gained over many years

Our range of services

Programme and project management

- Governance and decision-making
- Planning and initiation
- Monitoring and reporting progress
- Quality assurance
- Benefits realisation

Information systems strategy

- Strategic planning for IS
- Systems, structures and IS management
- IS governance
- Information security review
- Digital strategies

Software specialisms

- Accounting systems
- Information management
- CRM
- Fundraising and membership systems

Systems selection

- Requirements analysis
- Supplier selection
- Commercial contract negotiation

Other services

- Business case development
- Project reviews
- Process improvement
- Commercial relationship management

Advice and support

- Governance reviews
- Re-structures and re-organisations
- Recruitment help, job descriptions and selection
- Coaching and mentoring

Some of the organisations our consultants have helped...

THE INSTITUTE OF CHARTERED ACCOUNTANTS
IN ENGLAND AND WALES

Girlguiding UK

heritage foundation
Letchworth Garden City

“as we know, there are known knowns; there are things we know we know. We also know there are known unknowns; that is to say we know there are some things we do not know.

“as we know, there are known knowns; there are things we know we know. We also know there are known unknowns; that is to say we know there are some things we do not know. But there are also unknown unknowns — the ones we don't know we don't know. And if one looks throughout the history of our country and other free countries, it is the latter category that tend to be the difficult ones.”

Donald Rumsfeld, 2012

What is an ICT audit?

ICT Strategy Refresh

What it is

- ✓ Review of current strategy and status of projects
- ✓ Confirmation that the projects are still relevant and fit with organisational strategy

What it's not

- ✗ Complete re-write of IT strategy

ICT Review

What it is

- ✓ Development of IT strategy to meet organisational strategy
- ✓ Design of a programme of work to deliver strategy including timescale and indicative cost

What it's not

- ✗ Detailed focus on specific projects and their status

ICT Audit

What it is

- ✓ Focus on management controls
- ✓ Aligning IT with organisational strategy

What it's not

- ✗ Focus on sampling, testing and counting

First steps..... the scope of the audit

- Check for **operational risks** or **strategic ones** as well? A bit of both?
- Is the **focus** technology, management or broader issues of alignment with the organisational strategy?
- Should it include **digital, marketing** and **communications**?
- What is the **geographical scope**?
- What are the governance and stakeholder considerations?

What is the minimum?

- All areas of the control framework are important
- It is weakened by removing any of them
- The risk management process will usually have identified the key high profile risks
- If you could only choose three areas which would they be?

- ICT strategy and planning
- Operational controls and security
- ...

What can/should be outsourced?

- Outsource when you need independence
- Outsource when you need skills or experience you do not have internally
- Outsource when you do not have time!

What can/should be outsourced?

A Cloud Audit Checklist

Educate – what is ‘The Cloud’?

Learn – regulatory & compliance landscape

Benchmark – compare your compliance (GDPR)

Governance – agree organisational approach

Appoint – who can do what?

Secure – review IS security policies

A practical approach

- Talking to people
- Workshops
- Process mapping to identify data and information flows
- Identify control points

- IT alignment with organisational objectives
- Forward looking
- Cover key risk areas
- Think review as much as audit

Discussion

Questions & Answers

Thank you
